

Vector art or High resolution native Photoshop files are important for clean crisp logo decoration.

Remember Photoshop Files and Jpegs normally cannot be manipulated to change logo colors or create one color versions of your logo.

If you do not have the correct file, we can recreate a vector version of your logo for your approval and production.

Because of the cost of setting up multiple print colors, one Color logos can be much less expensive. For larger orders it is less of an issue. For smaller inexpensive items, one color is sometimes the only cost effective option.

Small and Narrow

Vertical

Decoration size and shape are important when determining which product works for your logo and which logo works for the maximum product decoration area.
